4 Free DNA Commercial Heifer Test with Every Bull Purchased

Dear Friends and Fellow Cattlemen,

It is a very special time to be in the cattle business with record high prices and some moderation in overall feed costs. We are excited for our annual Bull and Female Sale which again will be held at the Burley Livestock Auction in Burley, Idaho. The bulls have been on a balanced growing ration developed with our nutritionist. Our heifers were weaned in early October and have been on good alfalfa pasture and were then placed on a corn silage and chopped hay ration growing ration. They are being fed at our new Barker Cattle Company location approximately a mile north of Malta, Idaho. We invite you to stop by and inspect the offering at your convenience and don't forget to watch our website and blog for updated pictures and videos.

Barker Cattle Company's goals are simple and straight forward. We pledge ourselves to a sound and progressive breeding program. We are keenly dedicated to keeping our birth weight and calving ease standards at an acceptable level for both ourselves and our customers—the commercial and seed stock producers of the industry. We emphasize soundness in our cattle so that they will quickly acclimate and remain sound as they work on the ranches of Western America. We select our herd sires and the bulls we use in our artificial insemination program for easy fleshing, gain ability, easy calving and milking ability commensurate with the Western Environment.. We believe EPD'S on each individual should be studied and used in bull and female selection along with 50K DNA testing data where available. We understand and follow sound nutritional guidelines in an effort to maximize the genetic base of our livestock. By sale day all bulls will have been trich tested, semen tested, scrotal measured, and ear notched indicating they are IBR free.

We follow a strict animal health program which includes deworming both cows and calves twice a year. We strive to stay conversant with the most up to date cattle technology and incorporate the new developments in our operation. One of the newest technologies is the 50K DNA testing program which is the next step in the selection progression on unproven animals to produce better calves and more productive cows. We have 50K DNA tested our Angus bulls the past two years and many of you have studied the resultant data and used it in making your bull selections.

We offer purebred seed stock cattle in the Angus and Simmental breeds. We also believe strongly in taking advantage of Cross Breeding. Consequently along with the purebred cattle we offer Sim-Angus and High Performance Cross Bred Bulls.

Barker Cattle Company participates in two promotional programs: (1) We are members of Allied Genetics. If producers, using Barker bulls, market their calves on the Superior Auction and will alert us of the day and location, our Allied representatives will be there to bid on your calves and either buy them or help out by bumping the price a few cents. (2) When producers living in Raft River or Oakley High School areas buy Barker bulls 1% of the purchase price is given to their respective FFA Chapter for scholarship funds or other needs of the Chapter.

We believe in being fair and honest in all dealing with our customers, not just because that is the only way to stay in business but because it is the right way to do business.

Barker Cattle 2015 – SALE INFORMATION

First Breeding Season Guarantee: All bulls selling for $2500 or more are guaranteed for the first breeding season. A breeding season is defined as the 90 day period following the first turnout of the bull. If a replacement bull is available, he will be provided or if the buyer prefers, credit toward one bull will be given in the following sale, less salvage value of the injured bull. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage.

Sight Unseen Guarantee/Absentee Bidding: We realize it can be difficult for many of you to get away in the spring and we provide the following service to assist you. A 100% satisfaction guarantee for cattle purchased in your absence is offered if a designated representative of Barker Cattle Company makes the purchase for you.

Delivery: Free delivery on any bull to a central point up to 300 miles. Free delivery on 5 or more bulls purchased up to 500 miles to a central point. All other deliveries made at cost. All cattle will be delivered at the buyer's risk and within a reasonable length of time after the sale. Females delivered at cost. **We will offer a $50.00 credit per bull if you haul it home on sale day!**

Terms & Conditions: All Bulls & Heifers will sell under Suggested Sale Terms & Conditions of the major breed Associations. Terms are CASH. All animals are to be paid for during or immediately after the sale and will not be released until after settlement has been made. Cattle will not be transferred until paid for in full.

Registrations/Transfers: All bulls, unless otherwise noted in the sale catalog are registered. Buyer will be given registration papers at time of settlement unless they request an official transfer of the registration certificate. Heifer's papers are as noted in the catalog.

Announcements: All announcements from the auction block will take precedence over statements in the catalog. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

Liability: Barker Cattle Company representatives or any of the sale staff assume no liability, legal or otherwise for any accidents or injuries that may occur. Each animal will become the buyer's risk as soon as the animal is sold.

Breeding Guarantee: Open Female Guarantee- We guarantee that all breeding age cattle sold by Barker Cattle Company are fertile to the best of our knowledge. If an open female is determined as a non-breeder by a licensed, agreed upon vet, we will credit you the purchase price of the female (minus market salvage value) as credit to the ranch or the cattle from the same ranch in the next sale. You must notify us before you cull any infertile animals.

High Performance Cross Bred Bulls: Barker Cattle Company believes that taking advantage of high performance through cross breeding is very important. We love our foundation cross bred Sim/Angus cows. They are always the highest performers. If you are looking for bulls that will add depth, muscle, & performance to your calves but still maintain low birth weights, these are bulls that should be at the top of your list. Check out lots 86-91.

All Bulls have been semen tested, trich tested, ear notched for BVD "tested negative"

Supplement Sheets will be available prior to the sale with scrotal measurements and HD 50K test results on all Purebred Angus Bulls.

Calving Ease & Heifer Bulls

Barker Cattle Company is very serious about providing our customers with bulls possessing adequate calving ease credentials. We have learned that calving ease is not an exact science where a given mating always brings guaranteed results. We have also learned however that EPD's, blood line trends, and low birth weights can be predictive and when used collectively can greatly assist the breeder in his bull selection.

We have talked with all the breed associations we affiliate with and have asked them what their standards are to qualify a bull as a "heifer bull". Most of the breeds will not discuss a set of standards with you. To summarize the collective answers we received, we must conclude that anything under breed average is generally considered qualifying as Calving Ease. We think most seed stock breeders are hesitant to use the "heifer bull" designation too loosely. We know we certainly are. We would strongly suggest that when EPD's are considered, a positive CE preferably in the +5 range and above is very desirable and a low BW EPD in the +2.5 range and below, even into the negative range, should be what a bull buyer looks for if calving ease is important to him/her.

Also, when selecting a calving ease bull, we suggest the birth weight ought to be in the low 80's and preferably 80 pounds or below. Before we put "Calving Ease" stamp on a bull, we insist he satisfactorily meets all three of these criteria. Birth weight has so many causative variables that it should not be used as the sole calving ease determinate by itself. Accordingly we have identified approximately thirty five bulls as having "calving ease" credentials. The new 50 K testing serves as a great qualifier regarding calving ease and this data is given in percentiles. This data will be available on all PB Angus bulls on sale day as a supplement sheet and their HD50 K enhanced test results are reflected in the catalog EPD's.

In the Angus bulls, Two Stars represents Top calving ease according to EPD and 50K data. One Star represents calving ease by EPD scores. Still a Good calving ease rating. Simmental bulls are listed as calving ease that meet criteria.

GENEMAX Advantage

For years producers have made heifer and bull selections based on progeny data and visual observations. But times are changing, and so too are the most effective methods of identifying desirable traits. Now you can make better breeding decisions sooner and be more confident in heifer selection than ever before using GeneMaxR AdvantageT for selecting superior heifers. The all-new GeneMax Advantage allows you to identify females with superior traits. The following lots identified with the GeneMax logo will have this data available on a supplement sheet on sale day.

Sale time is a hectic time for all of us at Barker Cattle Company and we would like to thank those who helped us get ready for this event. Whether it was helping get the bulls clipped and worked, helping out behind the scenes, cooking & serving the meals, or just having a smile on your face to help encourage us along. Thank you for your support.
We appreciate your friendship & business.
Visitors to the ranch are welcome any time!

Congratulations!
To Ruel & Kay for a wonderful
accomplishment of 50 years!
We love you!

BARKER
CATTLE • COMPANY

CATTLE PRODUCERS!

CACHE COMMODITES has partnered with WESTWAY FEED PRODUCTS!

THEY'RE BIGGER. THEY'RE BETTER. THEY'RE ON . . . WESTWAY SUPPLEMENTS

WHY SUPPLEMENT WITH Westway Feed Products Distributed by Cache Commodities?

The beef cattle industry and its leaders recognize the benefits of Molasses supplements to their overall operation.

Westway is the industry's leaders in liquid feed supplement technology backed by proven research.

Westway provides balanced nutrition of supplemental protein, energy, vitamins, and minerals.

Cache Commodities is known for its superior service. Cache Commodities will *reduce* your labor, feed cost, and *reduce* feed waste, and save you time!

Westway has proven consumption control. You can rest assured that your cattle are receiving all the proper nutrients on a daily basis.

Westway is an economical source of nutrients that will fill the nutritional gaps in your forage program.

COW BODY CONDITION & Cache Commodities Supplements

Cows that are not supplemented when on poor feed will loose valuable body condition. Maintaining body condition is easier and more economical than building it once a cow's condition has deteriorated. It costs less money to supplement a good cow than to try to fix a poor one.

The table on the right illustrates the importance of body condition at calving to reproductive efficiency.

It takes just a little extra to get your cattle up to their potential. It takes the extra protein, energy, vitamins, and minerals you'll find in the ***WESTWAY*** line of liquid and block supplements.

Effect of Body Condition at Calving On Subsequent Reproductive Performance

		Body Condition Score at Calving		
		THIN	MODERATE	GOOD
Trial 1	Number Observed	272	364	50
	% in Heat within 80 days	62	88	98
Trial 2	Number Observed	168	274	197
	% Pregnant after 60 days	70	90	92

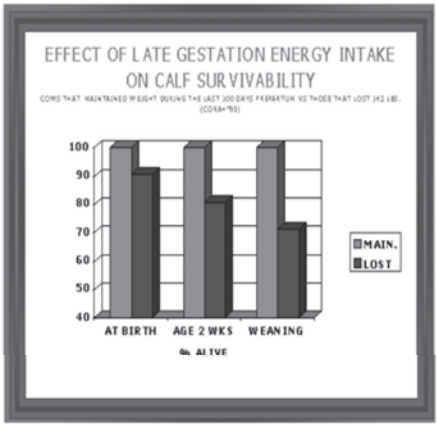
(Data adapted from *Texas Agricultural Extension Service* publication B-1526.)

Cows in better condition at calving are much more likely to rebreed early.

IMPROVED FORAGE DIGESTION & UTILIZATION

This chart depicts the adverse effects that failing to maintain cow body condition during late gestation can have on the survivability of calves until weaning time. Calves from cows that lost approximately 140 pounds during late gestation were only 70% as likely to reach weaning age.

This information stresses the importance of maintaining body condition on cows throughout the year, as well as demonstrating the economic incentive to do so. Cows that are maintained in a body condition of 3 to 4 have a much greater chance of re-breeding and weaning a healthy calf each year. So much so that failure to maintain body condition can reduce cow productivity by 30% or more.



ALLIED

GENETIC RESOURCES

LET OUR FULL CIRCLE ALLIED TEAM WORK FOR YOU!

Whom you choose to purchase your seedstock from is just as important as the individual bulls and heifers you choose to buy. Almost everyone in this business offers at least a few high value animals each year. There too is likely an auction sale nearly every week in 2015 that promises to be the biggest and best yet. You see them advertised constantly. With that in mind, how do you make that crucial decision on where to source seedstock? It is a decision that will literally affect your bottom line for the next 15-20 years? That's right, many of the bulls you buy in 2015 should still breeding cows in 2020 or beyond. That means the 10 year old cows that have made your operation profitable in the year 2031 will very likely be sired by those bulls. Does your seedstock supplier have a plan to still be providing you service in 2031 and beyond?

The member owners of Allied Genetic Resources do have a plan for the future. Market development and enhancement, value added programs, genetic decision support and strong allied industry relationships all are part of the long term approach employed by Allied. We know the genetics business will change. The profitability we are enjoying in the beef business today nearly guarantees upgrades to the system. Already today, documented, high value genetics help commercial producers ask and get more for the cattle they produce for the larger beef industry. I absolutely guarantee this trend is with us to stay and poised to be more important every year looking forward. Logical change that effects profit usually happens regardless of the business, at least most places in this world. When folks pay a lot for something, they expect more in return. More consistent and higher profit garnering genetics will be part of the risk reduction technology and strategy that drives feeder cattle and slaughter cattle pricing far into our future. Make better decisions today and the potential to benefit years from now is a very solid proposition.

What about service? Your seedstock supplier really only offers you a couple of unique value propositions year in and year out. The first is the proof and promise of genetic improvement. The very foundation for what these committed folks do everyday centers around offering better and more profitable genetics to customers, consistently. The other important factor that often separates one genetic source from another is customer service. We believe that everything else besides the non-negotiable genetic improvement that you should demand from your supplier can be lumped under the heading of service. Bulls developed properly and tested fertile in order to breed a maximum number of females in year 1 then last for 5-7 years is an important service. Friendly delivery terms, a great selection of genetics, customer satisfaction based warranty terms and even a comfortable sale day atmosphere with hot coffee and a good lunch are all, to some extent services. By the way if your seedstock producer does not warranty the bulls they sell to your satisfaction, we can find you and Allied breeder that will. Even the reputation of the genetic supplier you choose has impact on feeder prices at sale time. The member owners of Allied Genetic Resources show their commitment to customer service by concentrating on customer success. The Allied logo is a guarantee of value in itself. Every one of the Allied breeder network, more than 20,000 seedstock cows strong has made the commitment to enhanced opportunities available to the best group of commercial producers in the land, their customers.

Allied is blessed to work with the highest reputation and outwardly committed group of seedstock suppliers in the world. You'll find only commercially focused, profit minded folks in this alliance. For proof, just check out our membership scope and service options available at www.alliedgeneticresources.com . Feeder cattle and replacement female marketing are available by contacting Clint Berry with commercial herd strategies, seedstock procurement and beef chain consulting from Marty Ropp. Marketing plan assistance and advertising for commercial or seedstock producers is available from Julie Murnin, and for seedstock marketing solutions plus online options to bolster marketing value both for commercial cattle and genetics contact Garrett Thomas. We believe you will find substantial value in our full circle approach to providing services to the great customers of our Allied seedstock producers owners. Look for the Allied logo before you make your choice for high value genetics with service.
